

500 Supercharger

Electrification of the construction industry demands high power charging solutions. Ayond offers a robust supercharger made for solving temporary charging demands, with powerlock connections and lifting ears the charger is ready to use few minutes after arriving site.

The supercharger can be delivered from 150-500 kW charge power, with 1-4 CCS2 cables.

Product name	Supercharger 500
Weight	626 kg
Mobility	Lifting and truck handling
Max input	400V 800A
Connection	2 x 400A powerlock
Charging	CCS2 60-500 kW
Cooling	Air cooled system and cable
OCPP	1,6
Remote control	Modbus
Certification	IEC 61851-23 IEC 61851-1, Mode 4 DIN SPEC 70121
